February 2026

1 The Idea

This project was born out of a real problem we noticed while on Erasmus here in Las Palmas. Right now, event information is scattered across roughly 10 different WhatsApp groups. It is chaotic; messages get lost, and it's hard to keep track of what's happening, where and when. Because of it, you miss out on a lot of interesting events and trips.

We built this website to bring everything into one place. It's a simple, clear platform where any Erasmus student can see exactly what's coming up without scrolling through hundreds of chat messages.

2 How it Works

2.1 Finding Events

- **Main Page:** Shows a quick welcome and the 4 most recent events so you can see what is happening next.
- **All Events Page:** If you want to see the full calendar, this page lists everything in order. We grouped them by date so it's easy to navigate. User also have the option to filter by event type.
- **Event card:** The card itself has picture, for quick recognition, name, description, event type and other important information such as date, time and place at which the event takes place.
- **Filtering:** From all events page you can filter events by type (Social, Sport, Cultural, etc.). It's multi-choice, so you can look for "Sports" and "Trips" at the same time.
- **Search:** If you're looking for a specific event, you can use a search bar located in the top of the page. It will redirect you to All Events Page where all matching results will be displayed.

2.2 Event Details

Each event has its own card with a photo, time, and place. If you click on it, you get a full description and a direct link to the registration form, so you can sign up immediately.

2.3 Adding Events

The site isn't just for looking—it's for organizing, too. Once a member of a student organization creates an account and logs in, they gain access to a simple form to upload their own events, including descriptions, event type and pictures. It is also possible for members to edit or delete already existing events, that they previously created.

3 Design

Since students are usually checking their phones while out, we designed the site to work perfectly on mobile. We kept the look clean and simple with a light blue theme, so it's easy on the eyes and easy to use.
